

Dear FCC, I have been an XM satellite listener for over one year now. I truly love the diversity and availability of all the different types of music, talk shows, weather and traffic. When I travel to the different cities where there is a traffic report, XM makes it very easy to find out what the conditions of the roads are wherever I am. No longer do I need to spend 20 minutes racing up and down the dial to find a local traffic report before I take to the road. (I have the portable boom box XM so I can take it with me wherever I go)

Please don't let the National Association of Broadcasters remove the power of people to choose what they would like to hear. Doing so would be tantamount to denying the American another right in this age of ever decreasing rights. Please reject NAB's petition 04-160 and send a message to the NAB that the American people still do matter and have the ability to decide for themselves.

Sincerely  
Nathan Osburn
